***The Language of the Djembe*
Amadou Kouyate, Wolf Trap Teaching Artist**

Put on your watching eyes, turn up your listening ears, and adjust your thinking cap! It's time to learn the language of the djembe drum. If you don't have a drum, a table, container, or your lap will do!

To Prepare for This Performance

- **Have everybody join!** This performance is highly interactive and will include something for everyone! We encourage you to share this experience with friends, family, and educators of all ages.
- **Join at your own pace.** Don't worry if your child chooses not to participate in the whole experience, or is shy at first. They will likely be encouraged to join in if they see others participating.
- **Find a drum.** You can use your lap, a container, a table, or a drum to follow along with Amadou!

The djembe drum (pronounced *JEM-bay*) originated from the Baga people (of present-day Republic of Guinea), however emerged throughout West Africa during the expansion of the Mali empire in the 12th Century. More information about the Mali Empire can be found here:

The **djembe** is one of West Africa's best known instruments. This goblet-shaped drum is traditionally carved from a single piece of African hardwood and topped with an animal skin as a drumhead, most commonly goatskin.

The **kora** is a West African harp with 21 strings and a large calabash gourd body.
